-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☒ Responsive to communication(s) filed on 31 October 2006.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

### Disposition of Claims

**DETAILED ACTION**

***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1 and 3 are rejected under 35 U.S.C. 102(b) as being anticipated by Benjamin.

Benjamin discloses a pedal scooter having wheels 9 and 36, pedals 37-38, cranks 30-31 with rollers 40, chain /gear drive as shown in figure 9, and pedal sliding slots 46.

As to claim 3, the backward direction is an arbitrary direction and therefore is considered to be met by Benjamin.

***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Benjamin in view of Geschwender.

5. In view of the Geschwender flanges 81B, it would have been obvious to one skilled in the art to provide the Benjamin pedals with vertical flanges for safety purposes.

Art Unit: 3764

6. Claims 4-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Benjamin in view of Mertesdorf.

7. Mertesdorf discloses an exercycle and teaches the use of intermediate sprockets (unlabeled) which interconnect the cranks to the resistance wheel and for effecting a gear ratio change. In view of this teaching, it would have been obvious to one skilled in the art to utilize an reduction gear system in the Benjamin device for effecting a gear ration change.

### ***Response to Arguments***

1. Applicant's arguments filed 10-31-06 have been fully considered but they are not persuasive.

It is not necessary that Benjamin expressly state that the gears 26 and 29 are "rotating direction transmitting gears". Clearly they are gears which rotate in a direction and transmit forces.

The backward direction is arbitrary. The claim does not state CCW or CW directions. There is nothing in claim 3 which limits the backward direction to a certain CW or CCW direction.

Depending upon one's perspective, a crank can be driven backwards during the bottom half of the pedal's cycle or during the top half of the pedal's cycle.

As to claim 2, Benjamin actually provides a vertical foot-slipping protect flange 49 which meets the claim limitation; Geschwender merely teaches extending the flange completely forward.

As to claims 4-5, the argued limitation "direct meshing of he gears" is absent from the claims.

***Conclusion***

2. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
